Gabriel Nogueira

Software Engineer (MSc) | Scala | Vue | Javascript | LLM | Data Science

Recife, Pernambuco, Brazil

Summary

Software Engineer with a Master's in Computer Science (MSc), specializing in scalable web systems and AI-powered software engineering.

I work at the intersection of modern frontend architecture, high-performance backend systems, and LLM-driven software solutions, building robust, production-ready applications.

Core Engineering Focus:

- Frontend Systems (Vue.js, React)

I specialize in Vue.js, designing maintainable component architectures and high-performance interfaces for complex applications. I also maintain proficiency in React, allowing flexibility across modern frontend stacks.

- Backend Systems (Scala, Python)

I focus on Scala and functional programming paradigms to build resilient, concurrent backend services, alongside Python for data-driven and AI-integrated applications.

- LLM & AI Engineering

I work with LLM-powered systems to enhance automation, specification generation, and developer workflows. My research background in LLMs and Formal Verification strengthens my ability to design reliable and verifiable systems.

Infrastructure & Delivery

I apply DevOps practices using Docker and AWS, contributing across the full software lifecycle — from requirements and system design to deployment and production monitoring.

Interests

- Scalable frontend architecture with Vue.js
- Functional, high-performance backend systems with Scala
- AI-assisted software engineering
- LLM applications in development workflows

Experience

TXODDS (UK) Limited

Software Engineer

November 2024 - Present (1 year 7 months)

London Area, United Kingdom

University of Oxford

Academic Visitor

July 2024 - November 2024 (5 months)

Oxfordshire, England, United Kingdom

My work focuses on blockchain, smart contracts, formal methods, formal verification, natural language processing (NLP), and large language models (LLM). I develop strategies and frameworks to extract and verify formal specifications from natural language descriptions, aiming to enhance the reliability and security of blockchain applications.

Vigil

Software Engineer

August 2022 - July 2024 (2 years)

London, England, United Kingdom

Worked on the development, maintenance, and scalability of web applications.

PET-Informática

Member

May 2019 - April 2023 (4 years)

Recife, Pernambuco, Brasil

We are students from the Centro de Informática at the Federal University of Pernambuco who are involved in teaching, research and extension activities, seeking to improve the undergraduate experience for the entire academic community.

Brainy Resolution

2 years 4 months

Software Developer

December 2020 - September 2022 (1 year 10 months)

Recife, Pernambuco, Brazil

Maintain the products, create new features and improve existing ones.

Stack: Vue.js, Django, Firebase, React, Node.js, Docker.

Software Developer

June 2020 - November 2020 (6 months)

Recife, Pernambuco, Brazil

Develop Dissertio, a spelling, grammar and syntactic checker that uses resources built with Artificial Intelligence.

Stack: Vue.js, Firebase, AWS.

Neurotech

Software Engineer

December 2021 - August 2022 (9 months)

Recife, Pernambuco, Brazil

Develops improvements to the automation of the company's data lake crawler system.

Designed and implemented multi-platform credential management API for new employees.

Stack: Python, AWS, Docker, Terraform.

Viitra Inovações

Software Developer

December 2020 - November 2021 (1 year)

Recife, Pernambuco, Brasil

Innovation project with the National Council of Justice (CNJ). The project involves research in process mining, study of existing tools and design and development of a process mining tool with a focus on the Brazilian judiciary.

Stack: Angular, Flask, Postgres, Docker.

Centro de Informática UFPE

2 years 6 months

Teacher Assistant - Introduction to Computer Science

June 2019 - November 2021 (2 years 6 months)

Recife, Pernambuco, Brasil

I formulated tests about computer history and provided lectures on JavaScript, HTML, CSS, Git and Latex for over 50 students, on 2 classes of students on their first semester as computer science undergraduate.

Teacher Assistant - Introduction to Programming

August 2019 - December 2020 (1 year 5 months)

Recife, Pernambuco, Brasil

I provided lectures and formulated tests for over 60 students on Java and Object Oriented Programming, helping students on their first contact with programming languages.

Education

Centro de Informática UFPE

Master's degree, Computer Science · (August 2023 - August 2025)

Centro de Informática UFPE

Bachelor's degree, Computer Science · (2019 - May 2023)

Instituto Federal de Educação, Ciência e Tecnologia do Sertão
Pernambucano

Technical, Computer Science · (2015 - December 2018)
